SUEZ AND PETROBRAS SIGN MEMBRANE SUPPLY CONTRACT FOR 15 FPSO PLATFORMS

SUEZ – Water Technologies & Solutions will be the exclusive provider of membranes used in seawater sulfate removal (SWSR) systems on 15 floating production, storage, and offloading (FPSO) platforms operated by Petrobras located in the Campos, Búzios, Espírito Santo and Santos oil basins. The multi-million dollar contract renewal solidifies SUEZ’s install base and presence in Latin America.

“Petrobras is a leader when it comes to deep water offshore oil recovery,” said Kevin Cassidy, executive vice president, engineered solutions for SUEZ – Water Technologies & Solutions. “We are proud that they continue to rely on our membranes to prevent scale in injection wells and to better mitigate well souring by reducing sulfate.”

The contract adds to SUEZ’s long history of working closely with Petrobras for both on and offshore wastewater treatment applications. In 2019, Petrobras selected SUEZ membrane technology to replace poor performing systems at two main refineries in the region.

A leading manufacturer and supplier of membranes to the offshore oil & gas industry, SUEZ designs its [SWSR-Series](#) of membranes to consistently produce high-quality water for injection in undersea oil reserves. The nanofiltration membranes are recognized for their low fouling properties, ability to minimize strontium and barium sulfate scale, better mitigate well souring, and minimize the operating pressure through high transmission of sodium chloride into the permeate.

About SUEZ:

Since the end of the 19th century, SUEZ has built expertise aimed at helping people to constantly improve their quality of life by protecting their health and supporting economic growth. With an active presence on five continents, SUEZ and its 90,000 employees strive to preserve our environment’s natural capital: water, soil, and air. SUEZ provides innovative and resilient solutions in water management, waste recovery, site remediation and air treatment, optimizing municipalities’ and industries’ resource management through “smart” cities and improving their environmental and economic performance. The Group delivers sanitation services to 64

million people and produces 7.1 billion m³ of drinking water. SUEZ is also a contributor to economic growth, with more than 200,000 jobs created directly and indirectly on an annual basis, and a provider of new resources, with 4.2 million tons of secondary raw materials produced. By 2030, the Group is targeting 100% sustainable solutions, with a positive impact on our environment, health and climate. SUEZ generated total revenue of €18.0 billion in 2019.
