

VEOLIA: YOUR PARTNER FOR

ENVIRONMENTAL SECURITY

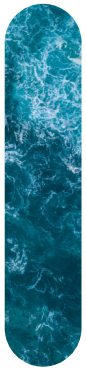

Water, energy, and waste are not separate challenges. They are interconnected, and organizations that manage them together gain a decisive advantage in resilience, efficiency, and sustainability.

Veolia in North America is the only partner that brings all three together at scale, operating your facilities, deploying proven technology, and managing your most complex environmental programs so you can focus on your core business.

GLOBAL OPERATIONAL AND TECHNOLOGICAL EXPERTISE LOCALLY DELIVERED ACROSS WATER, WASTE AND ENERGY.

Discover how Veolia in North America delivers water, waste and energy solutions specific to your needs.

WATER SECURITY

Safeguard your businesses and communities by protecting, preserving and reusing water resources.

Through water and wastewater treatment, operations and innovative reuse solutions, we ensure reliability, compliance and sustainability.

ENERGY RESILIENCE

Reduce energy costs while protecting operations from an increasingly constrained electrical grid.

From energy management and procurement to grid flexibility, battery optimization, microgrids and expert operations & maintenance, we help you lower costs, improve reliability and maximize uptime.

WASTE REGENERATION

Recover resources from wastewater, biosolids and industrial byproducts for circular reuse while protecting ecosystems and human health.

From hazardous waste treatment and solvent recovery to biosolids processing, we transform waste streams into managed, recoverable assets.

PARTNERING WITH VEOLIA MEANS PEACE OF MIND
